II. Major risks and uncertainties facing the Issuer during the remainder of the financial year

Advance TerraFund REIT is exposed to the common risks facing all public companies and economic entities in the real property segment, i. e. market environment – the agricultural land market environment in particular, the liquidity of investments and the comparatively low level of investment property use. The Company expects no material effect of such risks as the agricultural land market becomes more and more dynamic and liquid and the market relations in the segment are stimulated through subsidies for agricultural producers.

The financial assets and investments as at 30 September 2014 are denominated in BGN and EUR and, due to the operating currency board and the fixed BGN/EUR exchange rate, no currency risk exists. As at the date of preparation of this Interim Activity Report, the Company has no exposure to currencies other than BGN and EUR.

The Company invests a minimum of 80% of its portfolio in land designated for agricultural purposes and up to 20% in land in urbanized territories. The agricultural land is exposed to low risk of changes in prices and rent due to the interest of agricultural producers and other investors in real properties therein. The potential reduction of the prices of agricultural land is favourable for the investment policy of the Company and the fixed increases of the rental price as compared to the previous year increase the profitability of the investments. The increased risk in the segment affects mainly real properties designated for building construction and is a result of the global financial crisis. This situation has no material negative effect on the financial position and operating results of the Company. Nevertheless, the Company has undertaken measures for reduction of the share of land in urbanized areas to limit the price risk.

III. Information about material related party transactions

During the reporting period, Advance TerraFund REIT concluded no material related party transactions except for the ones reported in the Interim Financial Statements.
